

SNAVELY FOREST PRODUCTS, INC.

PRODUCT PROCUREMENT POLICY

Snavely Forest Products' goal is to source product from well-managed, sustainable-yield forests. We continue to work with our vendors and suppliers to increase our procurement of wood products from independently certified, well-managed forests. We do not and will not inventory or sell products made from endangered species.

Additionally, Snavely Forest sources product from vendors who manufacture quality recycled, engineered and alternative products when their environmental benefits are clearly demonstrated.

Snavely Forest Products supports those suppliers who use sustainable forest management practices, which integrate the world's social, economic and environmental needs.
